

WHAT IF....?

What if You Could Produce More Profitable Results—doing more valuable work—in least amount of necessary time—with as little energy as possible?—Larry Allen, Founder

Introduction to EP's Speech, Seminar and Workshop Topics

Enterprise Power (EP) is a management development and consulting firm with over 30 years global experience. **EP** partners with clients that want to grow their business as a person and as an organization. Larry Allen, **EP** founder, coach, consultant and professional speaker speaks on the topics shown below and conducts related seminars and workshops.

Our initial focus is on strategy, defining where clients are now, where they want to go and what it will take to get there. Generally, it follows that clients need to align their leadership system (the people side of the equation) with the operating systems (the way things flow through the organization) to make them compatible with accomplishing the strategy. To the degree clients have alignment of these three elements and synergy the more likely you will achieve the strategy. If there is no alignment or employees are not satisfied, then achieving the strategy is at risk.

Working with Enterprise Power you can

-  grow your business,
-  enhance performance as a person and as an organization,
-  accelerate bringing new products from original thought to market,
-  improve processes, and
-  increase profitability and prosperity for all stakeholders.

All of EP's efforts focus on partnering with clients to achieve and sustain clients' ultimate goal—to attract and retain customers in order to generate profits (or to be financially viable in the case of not-for-profits).

Speech, seminar and workshop topics are:

- **Your 'enterprise-power'—WHAT IF...?** *What if...you could produce more profitable results—doing more valuable work—in least amount of necessary time—with as little energy as possible?*
